

Emma Rooney – Orthotist

Emma has worked alongside consultants and physiotherapists in a multidisciplinary setting allowing her to gain a wealth of experience in all areas of Orthotics. Emma has a particular interest in lower limb biomechanics, paediatrics and injury prevention/rehabilitation. She is passionate about restoring natural foot function and believes Foot Orthotics should not be over prescribed. By improving general movement patterns and working on foot mobility and strength the need for Orthotics in the long term can be reduced. Emma is registered with Health and Care Professions Council (HCPC) and a full member of The British Association for Prosthetics and Orthotics (BAPO). She specialises in performing in depth patient assessments and analysing individual gait and movement patterns. Utilising video gait analysis and foot scan systems she can identify any intricacies and imbalances in your body that can often lead to pain or injury. Everyone is different and any treatment or advice offered will be bespoke to your individual presentation and needs.
